BUILDING DEPARTMENT***

PLUMBING PERMITS

A Plumbing Permit is required in Rockville Centre when you are making any alteration, deletion or addition to any fixture which uses water. This includes replacing one fixture with another, i.e., washing machine, dishwasher.

Only RVC licensed plumbers can be issued Plumbing Permits. If you need to ascertain if a plumber has a RVC license, a complete list is available at the Building Department for the public to look at. In addition, the plumber must provide us with the following items in order for the permit to be processed:

PERMIT REQUISITES

- Completed RVC Plumbing Application form – from Building Dept.
- Copy of plumber's liability and workers' compensation insurance - must be submitted each time a permit is submitted.
- See fee schedule for permit fees.

Please Note:

- A two (2) or three (3) pc direct replacement is the only applicable wording when there is no reconfiguration of fixtures, requiring a plumbing application only.
- A Level I Plumbing Permit / Slip Permit is required when the plumber installs sheetrock, insulation, and replaces the fixtures in the **exact** same location. A copy of the electrician's filing with the underwriter must accompany the Plumbing Permit. See fee schedule for Slip Permit fee.
- A Level II Plumbing Permit / Building Permit is required when the plumber installs sheetrock, insulation and replaces the fixtures in a **reconfigured** location. A copy of the Electrician's filing with the underwriter must accompany the Plumbing Permit. See fee schedule for Building Permit fees.
